## WATERLESS URINAL CONVERSION KIT

<b>Product Code</b>	<b>40243</b>
<b>Material</b>	Mixed
<b>Waterless</b>	Yes
<b>Colour</b>	Mixed
<b>Waste</b>	Suitable for 38mm

### Description:

Where water saving is the objective, why not consider converting to a waterless urinal. It requires no water supply and its unique design also reduces splash-back and prevents debris from entering the cartridge. You could save up to 150,000 litres of water every year.

### Key features:

- Waterless
- Includes Cartridge, service key, urinal adapter, back nut, knuckle joint, Steri Klear pipe pod.

### General information and maintenance

- The cartridge cannot come into contact with bleach or harsh cleaners.
- Spray and wipe down daily with a cleaner specifically designed for use with waterless urinals.
- Every 1-2 months the cartridge should be removed and drain should be flushed with 10 litres of water and a fizzy urinal block. Cartridge can then be reinserted.
- Depending on usage levels the cartridge should be replaced every quarter and the below should be done -
  1. Remove old cartridge with the provided key.
  2. Flush with a 10 litre bucket of water and a fizzy urinal block
  3. Rinse and recycle cartridge.
  4. Insert new cartridge and activate with 1 litre of clean water.
